

House renovation

FOR AN OUTSTANDING
COLLECTOR

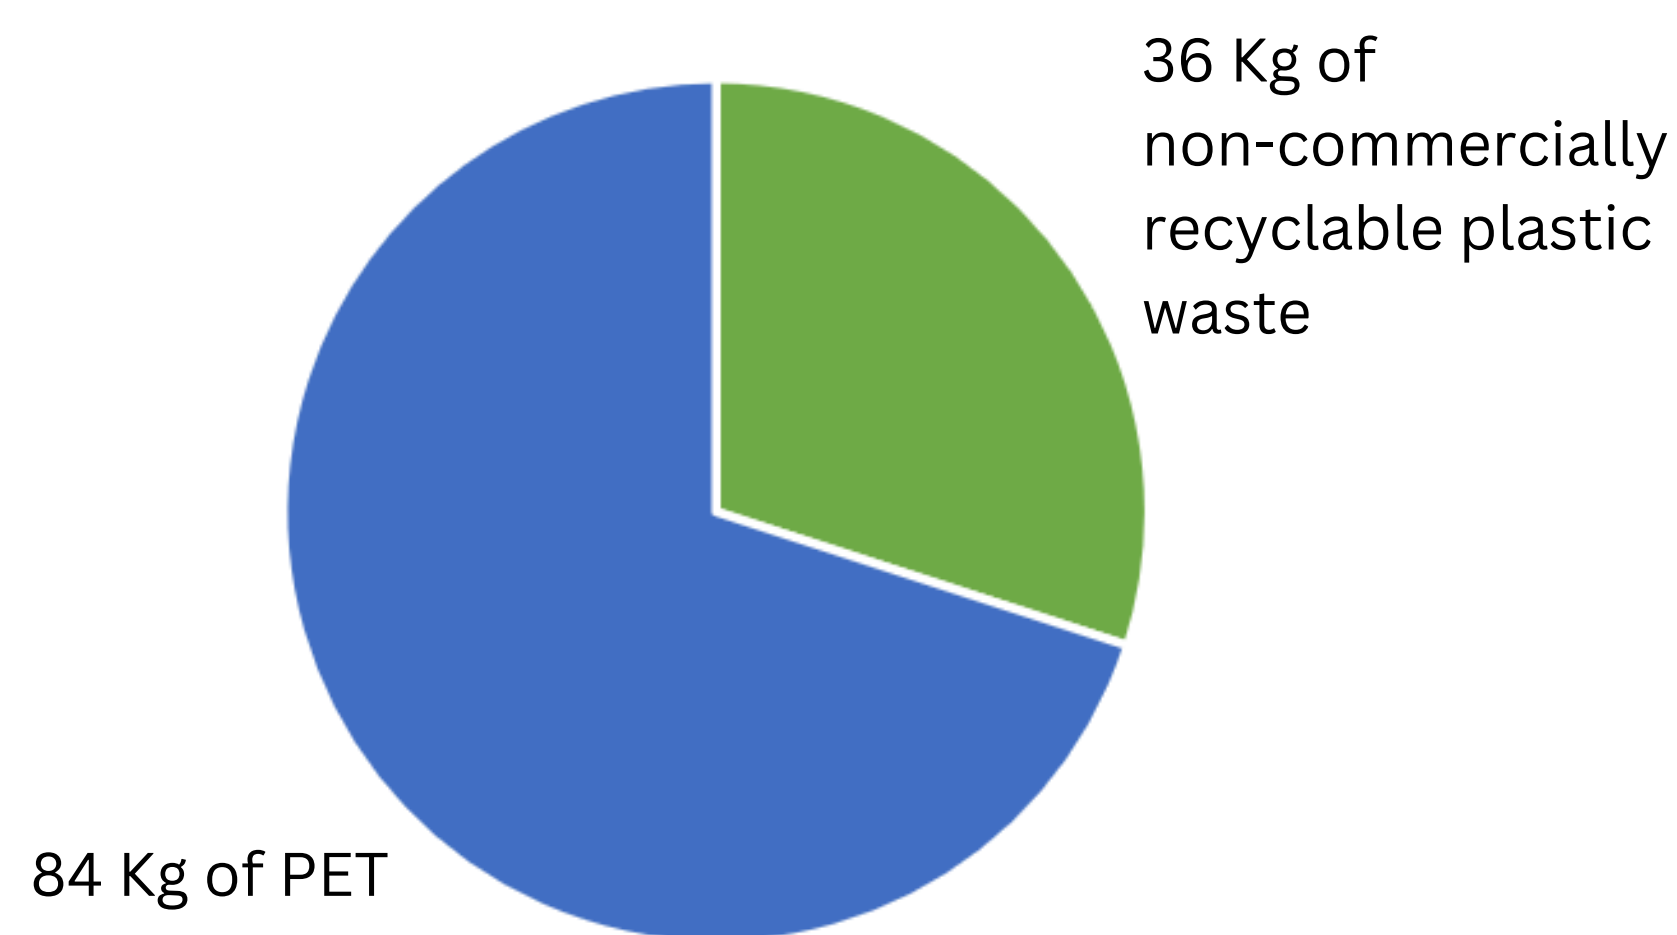

Chan Toch

Outstanding collector

May 2024

Dedication and Contribution

Chan Toch has been a steadfast waste collector for TONTOTON for nearly three years. She collects approximately 80 kg of plastic each month. In May, her efforts resulted in the collection of 120 kg of plastic, comprising 36 kg of non-commercially recyclable plastic and 84 kg of PET. Contributing to environmental cleanliness in her village Phum Thmey.

“Selling plastic to TONTOTON allows me to get additional income to buy water and food for me and my family”

Family Situation

Chan Toch lives with her daughter, son-in-law, and their four children. With three school-aged children and a baby, her daughter stays home for childcare, while her son-in-law's construction work is sporadic. Despite Chan Toch's income from collecting plastic, the family struggles to meet their basic needs.

Living Conditions

The family's home is small and in poor condition. They share a single bed, forcing Chan Toch to sleep outside. The house has a missing roof section and no side wall, exposing them to rain and wind, making it unsafe and uncomfortable.

Home Renovation Program

Recognizing her dedication, TONTOTON selected Chan Toch for their Home Renovation Program. The renovation included building a new wall with recycled plastic boards, completing the roof, and sealing holes to prevent leaks. This transformation has greatly improved the family's living conditions, providing safety, comfort, and stability.

The renovation of the house will drastically improve the family's living conditions. These changes will not only enhance their living space but also significantly improve their comfort, well-being, and stability.

One of TONTOTON's goals is to support members of the community. Many still live below the poverty line, and TONTOTON continually seeks new solutions to assist them.
